The maximum size of a Sidon set contained in a sparse random set of integers [Part 2]

Sangjune Lee
Emory University

Abstract: This is a continuation of the seminar last week on the maximum size of Sidon sets in sparse random sets of integers.
This is joint work with Yoshiharu Kohayakawa and Vojtech Rödl.
[Please note: This is part of the Combinatorics Seminar, an official course offered in the department this term. The time and place are the assigned ones for this course.]
