- It will move around, so just Google “Segfault Tank”
- Where to link your projects? Let me know.
Thanks to all teams!

- Credits are on the class website
- It will move around, so just Google “Segfault Tank”
- Where to link your projects? Let me know.
- Get out of my GitHub! Your options for private projects:
  1. Make project public
  2. Transfer ownership to paid Github account
  3. Clone locally and delete Github (will also delete all forks)

If I don’t hear back, I will delete and archive next week on 4/30

Postmortem

- Judge scores
Postmortem

- Judge scores
- Winners: why did they win?
Postmortem

- Judge scores
- Winners: why did they win?
- Losers: what was wrong?

Best mobile/web stack?
How to improve our software engineering process?
What's next for teams?
Postmortem

- Judge scores
- Winners: why did they win?
- Losers: what was wrong?
- Take home messages: what would you do different?

Time for some Yik Yak

Please welcome from Yik Yak:
- Tyler Droll
- Michael Morrissey
Judgement day for me: Your evaluations

- Mandatory peer evaluations will be posted.
- Will be in touch with grades.
- Happy programming...
