Exam 2 Information

1. Exam will be out of 65 points and will take 65 minutes. Each point is worth roughly 1 minute. Therefore a 5 point problem should take you approximately 5 minutes. Use this feature to pace yourself and manage your time.
2. 5 minutes will be allotted to seating, passing out exams, etc.
3. Exam will end promptly at 9:35 or 11:10am
   1. Put down your pencil when told to do so.
   2. I take 5 points off your exam if I have to tell you multiple times.
4. I will not answer questions during the exam. There are too many people.
5. Unless otherwise stated, assume code given will compile and execute.
6. No trips to the restroom during the exam. If you feel you need an exception to this policy, you need to notify me ASAP.
7. There is assigned seating, and you must sit in your assigned seat. Seating charts are posted. You should read your section’s seating chart and know where you should be sitting BEFORE entering the room. If you are in the incorrect seat, you will be asked to move. If you find another student in your seat, notify me immediately.
8. There will be NO multiple choice on this exam; all questions will be free response.
9. Answer all questions on your exam booklet.
10. There will be an extra page for scratch work or if you need to continue your answers. You must clearly mark that you are continuing an answer on that page. Otherwise, we will assume it is scratch work and ignore it.
11. See the class calendar for specific chapters and topics. Exam will cover material up through Tuesday, Nov. 3rd.
12. Resources for studying:
   1. codingbat.com (sections as discussed in class)
   2. Old exams/quizzes (linked from class calendar) These are not multiple choice, but the content of questions is similar.
   3. Homework & lab solutions (see labs and homework pages)
